

## Schroder Multi-Asset Income Fund

### Schroder Multi-Asset Income Fund

The fund aims to help investors meet their investment goals by targeting investments that deliver stable income and build capital while seeking to avoid major drawdowns when equity markets fall.

#### Why invest in the fund?

##### Stylised investment growth over time

<sup>1</sup> This chart is provided for illustrative purposes only, and shows the target volatility profile for the fund compared to the typical volatility profile of a conservative balanced portfolio. For this purpose, a conservative balanced portfolio is one that adopts a strategic asset allocation where the majority of assets are more defensive and income based, such as sovereign bonds and investment grade credit, with a lower allocation to growth assets, such as listed equities. This chart is not a forecast and may not be representative of the future performance of the fund. Illustrative purposes only.

#### Put your trust in an expert team of investment professionals

Our team of multi-asset experts is trusted to manage close to AUD\$7.3 billion for our clients\*. Their team-based approach is anchored in a consistent philosophy and forward looking investment process, as well as an extensive investment research agenda.

#### Flexibility to meet the challenges of a complex investing environment

Maximising the risk and return benefits of diversification takes astute asset allocation through market cycles. Choosing a fund that dynamically manages allocations helps to navigate markets as they rise and fall.

#### Exploring new opportunities in assets and investment solutions

As well as conducting deep research across traditional asset classes, our team looks at the broadest investment universe to find new opportunities for growth, while remaining focused on managing downside risk.

#### Global network

Access to Schroders' global investment teams across international equities, fixed income and alternatives provides a wide opportunity set, managed by Schroders' investment experts.

#### Protecting assets throughout retirement

Seeking to provide stable returns while limiting drawdowns in volatile market conditions, the fund is designed for investors seeking a conservative level of risk and return.

\* As at 31 August 2021. \*\* As at 30 June 2021.

### Investment guidelines

■ Defensive ■ Diversifying ■ Growth

Growth assets typically include shares and property securities. Diversifying assets include high yield debt and some alternatives. Defensive assets may include sovereign debt, investment grade debt and cash.

### Investment philosophy

It is our belief that delivering on investors' goals requires a careful balance between protection from risk and exposure to growth. We take an approach that continuously evaluates the potential cyclical and strategic risks of our asset allocation, as well as return expectations. In doing this, we can better adapt our investment choices to keep the portfolio on track towards its risk and return objectives.

### About Schroders

Over \$1,108bn\*\* managed globally and \$34bn\* managed locally across a number of asset classes

Extensive global network of investment professionals

Over 200 years' experience of investment markets and more than 50 operating in Australia

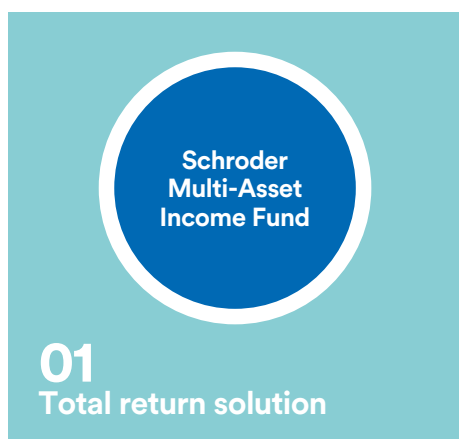

## How the fund fits into portfolios

**With its blend of stable income, diversification, and high liquidity, this is an investment choice suited to a wide range of portfolios and clients**

- **Total return solution** – with its diversification, liquidity and conservative risk profile the fund provides a whole of portfolio solution for clients seeking income and capital preservation during retirement.
- **Buckets** – for clients using the ‘risk buckets’ approach to their investment portfolio, the fund provides a solution to the short-term bucket.
- **Income** – for clients seeking regular income from their investments this fund provides a diversified investment, replacing low yielding cash and term deposits.
- **Core** – the conservative risk profile makes the fund an effective core allocation in a ‘core satellite’ approach that provides capital stability to the higher risk satellite components.

## Suitable for a broad range of investors

- This Fund is likely to be appropriate for a consumer seeking capital preservation and income for all or some components of their portfolio, with a medium to high risk and return profile.
- This Fund is unlikely to be suitable for a consumer seeking capital guarantee or for consumers with a very high risk and return profile or with a short investment timeframe.
