Schroders Capital Semi-Liquid Global Private Equity

C Accumulation USD | Data as at 04.30.2025

Fund objectives and investment policy

The fund aims to provide capital growth over the medium to long term by investing in a diversified range of private equity investments worldwide.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Schroders Capital Semi-Liquid Global Private Equity

C Accumulation USD | Data as at 04.30.2025

5 year return of USD 10,000

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated bid to bid (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

Risk considerations

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Tax risk: The Fund and its returns may rely on certain available tax efficiencies at the inception of the Fund which may be subject to changes in tax treatment or interpretations. Any change in the actual or perceived tax status or exposure of the Fund or its investments as well as in tax legislation, practice or in accounting standards could adversely affect the anticipated level of taxation.

Currency risk: If the fund's investments are denominated in currencies different to the fund's base currency, the fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates. If the investor holds a share class in a different currency to the base currency of the fund, investors may be exposed to losses as a result of movements in currency rates.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Interest rate risk: The fund may lose value as a direct result of interest rate changes.

Liquidity risk: The fund invests in illiquid instruments, which are harder to sell. Illiquidity increases the risks that the fund will be unable to sell its holdings in a timely manner in order to meet its financial obligations at a given point in time. It may also mean that there could be delays in investing committed capital into the asset class.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Private Equity risk: Private equity strategies are subject to a variety of risk conditions, including, but not limited to, the risk that too much is paid for acquiring a business, new or unproven management, new or less mature business strategies or unsuccessful integration with existing businesses.

Private Market Valuations: In times of stress it may be difficult to find appropriate prices for private asset investments and they may be valued on the basis of proxies or estimates. This may lead to significant changes in the valuation of the fund, or the inability to determine a reliable net asset value which may lead to a suspension of the fund.

Summary Risk Indicator (SRI)

LOWER RISK

HIGHER RISK

The risk category was calculated using historical performance data (or indicative fund performance during periods of suspension) and may not be a reliable indicator of the fund's future risk profile. The fund's risk category is not guaranteed to remain fixed. Please see the Key Information Document for more information.
