Fund objectives and investment policy

The Fund aims to provide capital growth over the medium to long term by investing in private equity worldwide.

The Fund will invest in equity interests of companies that are not listed on stock exchanges (private equity) and that are seeking to actively build, grow or transform. The Fund's assets will be allocated on an opportunistic basis across private equity strategies, regions, sectors and industries. The Fund may access investment opportunities through primary and secondary investments in private equity funds and direct investments or co-investments. The Fund may invest up to 100% of its total net assets in unlisted securities. However, no more than 10% of its total net assets may be invested in any single company. The Fund will not invest more than 25% of its total net assets in funds or companies managed by any single general partner. Such limits will not be applicable during the 12 months following the Fund's launch date. The Fund may exceptionally hold up to 100% of its assets in cash. The Fund is expected to have access to a credit facility of up to 30% of NAV. This would be used in periods of intense market stress to avoid having to make forced asset sales to meet capital calls on commitments from the underlying portfolio of the Fund. Recommendation: Investors should seek independent advice or satisfy themselves that they have an understanding of the strategies and techniques employed by the manager. The fund is valued with reference to the net asset value of the underlying assets.

Relevant risks associated with an investment in this fund are shown below and should be carefully considered before making any investment. Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of investments to fall as well as rise. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.

Risk considerations

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Private Assets risk: Investments in private assets carry greater counterparty and liquidity risk. As there is no active market for private assets, it could prove difficult to sell and objectively value the fund's assets. The fund may have to lower the selling price, sell other investments or forego more appealing investment opportunities. The actual value may not be recognised until the assets are sold.
