

Important Information:

The fund invests primarily in Chinese equities and fixed income securities.

1. The fund is exposed to general investment risk. Investors may be subject to loss and there is no guarantee of the repayment of principal.
2. The fund is subject to risk relating to asset allocation strategy where there is no assurance that such strategy will be successful. Periodic rebalancing of fund investment may incur greater transaction costs.
3. The fund's investment in equity securities would subject to equity investment risk.
4. The fund's investment in fixed income securities may be subject to credit and counterparty, credit rating risk, etc. The fund's investment in below investment grade and/or unrated debt securities may be subject to higher degree of the above risks.
5. The fund is exposed to China market risk which may be subject to change in political, social and economic policy risk, legal and regulatory risk, and mainland China taxation consideration etc.
6. The fund may invest in derivatives for hedging purposes. In adverse situations, the fund's use of derivatives may become ineffective in hedging and the fund may suffer significant losses. Risks associated with derivatives include counterparty risk, credit risk and liquidity risk. Such exposure may lead to a high risk of capital loss.
7. For distribution share classes/units, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the fund. Distributions may be paid out of the capital of the fund at the Manager's discretion. This amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share or decrease in the value of units of the relevant Distribution Units.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

Schroder China Asset Income Fund

Coast through China's investment
highway of multi-asset opportunities

| 31 December 2025

Schroders

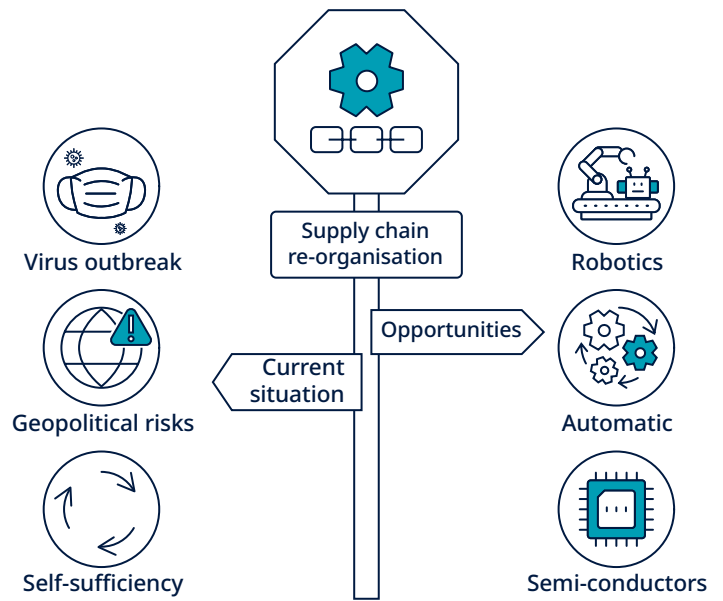

Why invest in the Schroder China Asset Income Fund?

Capitalise on the post-coronavirus growth opportunities in China

The dynamic, fast-changing equity market in China offers investors ample unique investment opportunities to capture the growth potential of existing investment trends and those that have emerged after the Covid-19 outbreak.

For example, China is already one of the markets with the fastest-growing online retail penetration. The acceleration and evolution of the country's e-commerce ecosystem in the post Covid-19 era are set to prompt more investment ideas. The re-organisation of supply chains, amid rising geopolitical risks, the disruption from the virus outbreak and the growing importance of self-sufficiency for many of the industries in China, is also bringing forth a lot of new opportunities, such as production automation, robotics and semiconductors, to name but a few.

Our dynamic focus helps us identify these evolving trends early on and capitalise on these growth opportunities across different industries and sectors in China.

Attractive yields from the China bond market

Apart from equities, the country's fixed income market also offers growth potential. The Chinese onshore bond market is the world's second largest by market value, while the offshore Chinese US Dollar corporate bond market is also the largest within the Asian universe, providing a lot of interesting opportunities for income-seeking investors.

The China bond market provides a diverse universe of income opportunities, both onshore and offshore. The inclusion of the onshore bond market in major global bond indices will likely fuel investors' interest in the market going forward.

Active asset allocation with risk management

The fund's active asset allocation between Chinese equities (30–70%), Chinese bonds (30–70%), other asset classes (0–20%) and cash (0–30%)~ aims to capture growth and income opportunities in China. We will also actively manage the exposures to onshore equities and fixed income to take advantage of the growth potential of onshore assets. In addition, risk management on currency and interest rates is implemented from time to time with the aim to reduce potential losses during difficult markets.

Active asset allocation aims to enhance overall performance

Allocation (%)

Regular monthly payout[^]

With zero or even negative interest rates, income on assets will continue to be one of the important components of investors' returns. The fund offers investors a regular monthly payout[^], backed by a sustainable stream of income mainly from the fixed income portfolio, and to a lesser extent from the equities in the fund.

~ The exact asset allocation may deviate from the range mentioned above without prior notice to investors, please refer to the relevant offering document for details.

[^] In respect of the distribution units, the manager will declare and pay monthly distributions. However, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the fund. Distributions may be paid from capital of the fund. Investors should note that where the payment of distributions are paid out of capital, this represents and amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the value of units.

Schroder China Asset Income Fund
