### What is this product?

#### Type

This is an open ended UCITS fund.

#### Term

The fund is established for an unlimited period. In certain circumstances the fund may be unilaterally terminated in accordance with legal requirements.

#### Investment objective

The fund aims to provide income and capital growth and has a cumulative objective of: (i) offering returns in line with SONIA; and (ii) preserving the value of the investment before fees have been deducted\* over a three to five year period, by investing in money market instruments denominated in Sterling and issued by governments, government agencies and companies worldwide. \*For the target return after fees for each share class please visit the Schroder website: <https://www.schroders.com/en/ie/professional-investor/target-returnafter-fees/>

There can be no assurance that the fund will achieve its investment objective.

The fund is actively managed and invests in bonds and money market instruments with the following characteristics:

- rated investment grade as measured by a recognised rating agency in addition to receiving a favourable assessment of their credit quality pursuant to the investment manager's Credit Quality Assessment Procedure;
- denominated in Sterling; and
- issued by governments, government agencies and companies in any sector worldwide.

The fund will invest only in money market instruments with a maturity at issuance or residual term to maturity of 397 days or less. At least 10% of the fund's assets will be daily maturing and at least 30% of the fund's assets will be weekly maturing (provided that highly liquid government securities which can be redeemed and settled within one day and have a residual maturity of up to 190 days may be included in the weekly

maturing assets, up to a limit of 17.5%). The fund will maintain a weighted average maturity of 60 days or less and a weighted average liquidity of 120 days or less. The fund may use repurchase and reverse repurchase agreements and may invest in cash and deposits and units or shares of other short term money market funds in accordance with the requirements of the money market funds regulation.

The fund is valued with reference to the net asset value of the underlying assets.

**Benchmark:** The fund's performance should be assessed against its target benchmark, being to provide a return in line with SONIA. The investment manager invests on a discretionary basis and is not limited to investment in accordance with the composition of a benchmark.

**Currency:** The sub-fund currency is GBP. The share class currency is GBP.

**Dealing Frequency:** You may redeem your investment daily. Please refer to the prospectus for further information.

**Distribution Policy:** This share class pays income received from the fund's investments to you monthly. Please refer to the prospectus for further information.

**Depositary:** J.P. Morgan SE, Dublin Branch

### What are the risks and what could I get in return?

#### Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

#### Performance Scenarios

We have classified this product as 1 out of 7, which is the lowest risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Be aware of currency risk. In some circumstances you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

You can find more information about the other risks in the prospectus at [www.schroders.com](http://www.schroders.com).

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios

shown are illustrations based on results from the past and on certain assumptions.

The stress scenario shows what you might get back in extreme market circumstances.

The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 04 2019 to 04 2022

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 11 2019 to 11 2022

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 06 2021 to 06 2024

## What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

The fund's assets are held in safekeeping by its depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A. In addition, the fund's assets are segregated from the depositary's assets, which limits the risk of the fund suffering loss in case of default or insolvency of the depositary or someone acting on its behalf. However in the event of any loss, there is no compensation or guarantee scheme in place which may offset such loss.

## What are the costs?

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- GBP 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	GBP 6	GBP 17
Annual cost impact (*)	0.1%	0.1% each year

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0,6 % before costs and 0,5 % after costs.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
