Directors' Report

The Company

Schroder GAIA (the 'Company') is an umbrella structured open-ended investment company with limited liability, organised as a 'société anonyme' and qualifies as a SICAV under Part I of the Law of 17 December 2010 as amended. The Company was incorporated on 21 October 2009 and its Articles were published in the Memorial on 12 November 2009 as amended.

Schroders is a FATCA compliant organisation. The FATCA classification of this entity and its GIIN is as follows: FATCA entity classification: FFI; Sponsoring entity: Schroder Investment Management (Europe) S.A. (the 'Management Company'); Sponsoring entity GIIN: 4RIMT7.00000.SP.442.

Financial Statements

The Board of Directors (the 'Directors') of the Company submit their report and the audited financial statements for the year ended 30 September 2024.

At the date of this report, there were 11 Sub-Funds available for investment within the Company (the 'Sub-Funds'). Please refer to the current prospectus for the investment objectives of the Sub-Funds as well as details of investment restrictions. The Investment Manager's report for each Sub-Fund can be found in the quarterly investment reports, which can be obtained from the Company's registered office and are also available on the website of the Management Company (http://www.schroders.lu).

This report covers the year from 1 October 2023 to 30 September 2024. The last day on which prices were calculated was 30 September 2024, the last working day of the year under review. The financial statements are prepared in accordance with Luxembourg regulations relating to undertakings for collective investment (UCI).

On 30 September 2024, the total net assets of the Company were EUR 5,760,793,489 compared to EUR 4,928,621,911 on 30 September 2023, representing an increase of 16.88%.

Directors' Responsibilities

The responsibility of the Board is governed by Luxembourg law. With respect to the financial statements of the Company, the Board of Directors are required to prepare financial statements for each financial year which give a true and fair view of the assets, liabilities and financial position of the Company and each of its Sub-Funds as at the financial year end and of the profit or loss of the Company and each of its Sub-Funds for the financial year.

The Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Sub-Funds will continue in business.

The Directors are responsible for ensuring the maintenance of adequate accounting records. In this regard, they have entrusted the assets of the Sub-Funds to Brown Brothers Harriman (Luxembourg) S.C.A. (the 'Depositary') for safe-keeping. The Directors have responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

Board Meetings

During the year ended 30 September 2024, there were 7 board meetings held.

Corporate Governance

The Company is subject to corporate governance based on:

- 1. Its obligations as defined by the UCITS Directive 2009/65/EC dated 13 July 2009, as implemented in Luxembourg law, which is available for inspection at the registered office of the Company at 5, rue Höhenhof, L-1736 Senningerberg, Grand Duchy of Luxembourg.
- 2. Its Articles of Incorporation which are available for inspection at the registered office of the Company and at the Luxembourg corporate and trade register, Registre de Commerce et des Sociétés ('RCSL').
- 3. The obligations in respect of the management of the Company, for which the Company has appointed Schroder Investment Management (Europe) S.A., which is subject to the requirements of the Management Company Directive 2010/43/EC, as implemented in Luxembourg law.
- 4. The Association of the Luxembourg Fund Industry ('ALFI') Code of Conduct for Luxembourg Investment Funds, the principles of which the Company has voluntarily adopted.

Internal Control and Risk Management Systems

The Board of Directors is responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board of Directors has contracted with the Management Company to put procedures in place to ensure all relevant accounting records are properly maintained and are readily available including the production of annual and semi-annual reports. The annual and semi-annual reports of the Company are required to be approved by the Board of Directors and filed with the Commission de Surveillance du Secteur Financier ('CSSF') and, in the case of annual reports, with the RCSL. The annual statutory financial statements are required to be audited by independent auditors who report to the Board of Directors on their findings.

The Board meets at least four times a year and ensures that the Company maintains high standards of integrity and control in its operations and that it possesses adequate governance and means of control as law and regulation demand.

Sustainable Finance Disclosure Regulation

Information about the environmental or social characteristics and sustainable investment objective, as applicable, is available in Appendix III - Sustainable Finance Disclosure (Unaudited).

Directors' Report (cont)

Activities During the Year

1. New share classes

The following share classes were made available during the year under review:

| Sub-Fund and Share Class | Share Class Currency | Sub-Fund Base Currency | Launch Date |
|---------------------------------------|-------------------------|---------------------------|------------------|
| Schroder GAIA Asian Equity Long Short | | | |
| Class E Acc | USD | USD | 6 December 2023 |
| Class E Acc EUR | EUR | USD | 6 December 2023 |
| Class IZ Acc EUR | EUR | USD | 6 December 2023 |
| Class X1 Acc | USD | USD | 6 December 2023 |
| Class X1 Acc EUR | EUR | USD | 6 December 2023 |
| Class X1 Acc GBP | GBP | USD | 6 December 2023 |
| Class X1 Acc GBP Hedged | GBP | USD | 6 December 2023 |
| Schroder GAIA Cat Bond | | | |
| Class A Dis | USD | USD | 8 December 2023 |
| Class X Acc | USD | USD | 22 December 2023 |
| Class X Acc CHF Hedged | CHF | USD | 22 December 2023 |
| Class X Acc EUR Hedged | EUR | USD | 22 December 2023 |
| Schroder GAIA Contour Tech Equity | | | |
| Class C Acc BRL Hedged | USD | USD | 20 August 2024 |
| Schroder GAIA Two Sigma Diversified | | | |
| Class C Acc BRL Hedged | USD | USD | 12 June 2024 |

Schroder GAIA Cat Bond share classes Y3 Acc, which launched on 22 December 2023, were renamed to X Acc on 13 September 2024. The X share class maintains the same characteristics and eligibility criteria as the Y3 share class, and the fee structure and ISINs remained unchanged.

2. Share class liquidations

The following share class was liquidated during the year under review:

| Sub-Fund and Share Class | Share Class Currency | Sub-Fund Base Currency | Liquidation Date |
|-----------------------------|-------------------------|---------------------------|------------------|
| Schroder GAIA SEG US Equity | | | |
| Class R3 Acc CHF Hedged | CHF | USD | 17 July 2024 |

The Board of Directors

Schroder GAIA 30 September 2024

Investment Manager's Report

The Sub-Funds in the Schroder GAIA range can take advantage of positive or adverse market conditions through long or short exposures. This approach can sometimes result in quite diverse performance in the short term relative to the markets in which the Sub-Funds invest.

Economic review

The 12-month period was dominated by changing expectations over when major central banks might be able to cut interest rates.

Softer-than-expected US inflation data in late 2023 reinforced the market's view that the Federal Reserve (Fed) had finished its rate hiking cycle and would move towards cuts early in 2024. However, as 2024 progressed, inflation proved to be stickier than expected and markets were forced to push back both the timing and extent of US rate cuts.

Whereas markets had priced in six or seven rate cuts at the turn of the year, the March "dot plot" that details policymakers' expectations of rate cuts suggested only three cuts this year.

However, some weaker employment data in early summer led to fears that the Fed may have left it too late to cut rates, prompting worries about the prospect of economic slowdown or even recession. The Fed responded in September with a 50 basis point (bps) cut to interest rates, larger than the typical 25 bps move.

It was a similar situation for the eurozone and UK, with higher-than-expected inflation resulting in the dialling back of expectations around policy easing. Both central banks did cut interest rates during the period.

A key contrast, however, came from Japan. In March 2024, the Bank of Japan (BoJ) overhauled its monetary policy measures, not only ending negative rates but setting a short-term rate at 0.0-0.1%. The BoJ also abandoned its yield curve control policy. This came in response to rising inflation in Japan and signs of higher wages being agreed. The BoJ then raised interest rates further to 0.25% in July.

In emerging markets, mixed economic data from China continued to suggest a lacklustre economic recovery from the Covid-induced slowdown of prior years. The ongoing real estate crisis continued to weigh on sentiment. The Chinese authorities responded with a package of stimulus measures in September 2024. This included interest rate cuts, funding for the stock market and support for the property sector.

Geopolitical risks were also to the fore over the period. The Russia-Ukraine war continued while October 2023 brought renewed conflict in the Middle East. Numerous elections were held around the world during the period but investor attention was largely focused on the US Presidential election taking place in November 2024.

Equity market review

Global equity markets notched up strong gains over the 12-month period. This was despite some instances of marked volatility, notably in late July/early August.

Overall, shares were supported by hopes that the US economy would achieve a soft landing and by expectations of further interest rate cuts. Resilient corporate earnings in several sectors also supported shares, as did enthusiasm around new technologies and artificial intelligence (AI). That said, some doubts about the likely returns to be made on large scale AI investment contributed to the volatility in markets.

The MSCI World index returned 32.4% (in US dollars) for the period. US shares led the gains, supported by a strong advance for some AI-related companies. The MSCI World Growth index outperformed its value counterpart, though some more lowly valued sectors began to perform better as interest rate cuts were forthcoming.

The volatility in late July and early August sprang from several sources. The Bank of Japan raised interest rates while some weak US labour market data triggered expectations of steep US rate cuts. This impacted currencies and led to a brief steep fall in Japanese shares in particular, though they posted gains for the period overall.

Emerging markets slightly lagged their developed market counterparts. The MSCI EM index returned 26.0% (in US dollars). Optimism over the prospects for technology-related stocks helped Taiwanese equities to perform strongly. Shares in India also posted a notable advance. China was a key laggard for much of the period under review amid worries over its real estate sector. However, hopes of additional stimulus boosted shares at the end of the period.

Fixed income market review

During the fourth quarter of 2023, easing inflationary pressures in the major economies convinced investors that interest rates had peaked and triggered a sharp rally in bond markets into the year end. However, the first half of 2024 saw market participants scale back expectations for rate cuts and yields rose accordingly until the third quarter, when easing inflationary pressures renewed hopes of rate cuts, particularly in the US. Reminder: yields tend to move inversely to prices.

Over the 12-month period, the 10-year US Treasury yield fell from 4.57% to 3.79%. Weaker US labour market data prompted the Federal Reserve to sanction a 0.5 percentage point interest rate reduction at its September meeting.

Japanese government bond yields rose as the Bank of Japan abandoned its negative interest rate policy and raised borrowing costs to 0.25% in July. The 10-year government bond yield climbed from 0.77% to 0.86% over the period.

In contrast, Germany's 10-year Bund yield fell from 2.84% to 2.13% as investors began to anticipate the European Central Bank would become the first major central bank to cut interest rates, which duly occurred in early June with a further reduction in September. The 10-year UK gilt yield fell from 4.44% to 4.01% as the economy entered a technical recession in the second half of 2023.

Credit spreads tightened significantly over the 12-month period, with both the investment grade and high yield markets benefiting from strong investor demand for new issues and in the secondary market. Spread tightening was most marked in the US and European high yield corporate bond markets.

The US dollar recorded a 38-year high against the yen in June, before a sharp decline as investors anticipated a narrowing interest rate differential between the US and Japan. Overall, the US dollar index weakened, declining sharply during Q3 as expectations shifted decisively towards a US rate cut in September.

Investment Manager's Report (cont)

Outlook

A soft landing for the US economy continues to look the likeliest outcome. Rising unemployment has not been driven by layoffs, but rather elevated inward net migration outpacing the normalisation in job creation. More broadly, labour market conditions have moved into better balance, which ought to see hiring and wage growth revert to a more typical pace. Taken alongside further disinflation and improving credit availability, this should serve to sustain solid household consumption and, by extension, economic activity more generally. Inflation has continued to move in the right direction, enabling a stimulative stance from the Federal Reserve. This provides a positive backdrop for US equities.

In the eurozone, factory output continues to lag far behind consumer-facing sectors despite the upturn in the global goods cycle. With manufacturers faring better elsewhere, this might point to a structural loss of competitiveness.

Chinese shares made strong gains at the end of the period amid the announcement of some monetary stimulus measures and hopes of more to come. Further fiscal stimulus will need to be announced to really change expectations of Chinese growth.

Schroder GAIA

Audit Report

KPMG Audit S.à r.l. 39, Avenue John F. Kennedy L-1855 Luxembourg

To the Shareholders of Schroder GAIA 5, rue Höhenhof, 1736 Senningerberg Grand Duchy of Luxembourg Tel.: +352 22 51 51 1 Fax: +352 22 51 71 E-mail: info@kpmg.lu Internet: www.kpmg.lu

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Schroder GAIA and each of its sub-funds ("the Fund"), which comprise the Combined Statement of Net Assets and the Portfolio of Investments as at September 30, 2024, and the Combined Statement of Operations and the Combined Statement of Changes in Net Assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Schroder GAIA and each of its sub-funds as at September 30, 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the Audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Audit Report (cont)

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Audit Report (cont)

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Luxembourg, January 23, 2025

Notes to the Financial Statements as at 30 September 2024

The Company

The Company is an open-ended investment company organised as a société anonyme' under the laws of the Grand Duchy of Luxembourg and qualifies as a Société d'Investissement à Capital Variable ('SICAV'). The exclusive objective of the Company is to place the Sub-Funds available to it in transferable securities of any kind and other permitted assets, including financial derivative instruments, with the purpose of spreading investment risks and affording its Shareholders the results of the management of its portfolios.

The investment strategy of each Sub-Fund is based on an alternative investment strategy which has been designed and is currently managed by each of the Investment Managers.

Classes of Shares

The Share Classes available for each Sub-Fund are set out in the current prospectus, along with details of any minimum subscription, minimum additional subscription and minimum holding amounts and details of initial charges (where applicable) for each Share Class.

Shares are generally issued as Accumulation Shares. Distribution Shares will only be issued within any Sub-Fund at the Directors' discretion. Investors may enquire at the Management Company or their Distributor whether any Distribution Shares are available within each Share Class and Sub-Fund.

The Directors may decide to create within each Sub-Fund different Share Classes whose assets will be commonly invested pursuant to the specific investment policy of the relevant Sub-Fund, but where a specific fee structure, currency of denomination or other specific feature may apply to each Share Class. A separate Net Asset Value per Share, which may differ as a consequence of these variable factors, will be calculated for each Share Class.

E Share Class is not available through Schroders' global network of distributors. For any questions in this regard, please contact the Management Company.

Summary of Significant Accounting Policies

The financial statements are prepared and presented in accordance with generally accepted accounting principles in Luxembourg for investment funds on a going concern basis.

Net Asset Value

Calculation of Net Asset Value per Share

The Net Asset Value per Share of each Share Class is calculated on the Calculation Day in the currency of the relevant Share Class. It will be calculated by dividing the Net Asset Value attributable to each Share Class, being the proportionate value of its assets less its liabilities, by the number of Shares of such Share Class then in issue. The resulting sum shall be rounded to the nearest, up to, four decimal places. Further details on rules that apply in valuing total assets can be found in the current prospectus.

The financial statements are prepared on the basis of the last NAV calculated during the year (30 September 2024 for all Sub-Funds) and presented in accordance with Luxembourg generally accepted accounting principles for investment funds.

Valuation of the Assets of the Company

The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Company may consider appropriate in such case to reflect the true value thereof.

The value of securities, financial derivative instruments and assets is determined on the basis of the prices at the close of market on the Business Day, on the stock exchange or any other Regulated Market on which these securities or assets are traded or admitted for trading. If a security is not traded or admitted on any official stock exchange or any Regulated Market, or in the case of securities so traded or admitted the last available price of which does not reflect their true value, the Directors are required to proceed on the basis of their expected sales price, which shall be valued with prudence and in good faith.

The financial derivative instruments which are not listed on any official stock exchange or traded on any other organised market are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Company's initiative.

Should any of the aforesaid valuation principles not reflect the valuation method commonly used in specific markets or if any such valuation principles do not seem accurate for the purpose of determining the value of the Company's assets, the Directors may fix different valuation principles in good faith and in accordance with generally accepted valuation principles and procedures.

Units or Shares in open-ended UCIs shall be valued on the basis of their last available Net Asset Value as reported by such UCIs.

The total financial statements are expressed in EUR, the currency of the Company, and the financial statements of the Sub-Funds are expressed in the relevant base currency. The applicable exchange rates prevailing at the end of the year are used to translate currencies other than EUR into EUR for the Statement of Net Assets, Statement of Operations and Statement of Changes in Net Assets.

Swing Pricing

A Sub-Fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares in a Sub-Fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to counter this impact, a swing pricing mechanism may be adopted to protect the interests of the Shareholders of the Sub-Fund. If on any valuation day, the aggregate net transactions in Shares of a Sub-Fund exceed a pre-determined threshold, as determined and reviewed for each Sub-Fund on a periodic basis by the Management Company, the Net Asset Value per Share may be adjusted upwards or downwards to reflect net inflows and outflows respectively.

The net flow will be determined by the Management Company based on the latest available information at the time of calculation of the Net Asset Value per Share. The extent of the price adjustment will be set by the Management Company to reflect dealing and other costs. Such adjustment may vary from Sub-Fund to Sub-Fund and in normal market conditions is not expected to exceed 2% of the unadjusted Net Asset Value per Share of the relevant Sub-Fund on any Dealing Day.

The mechanism has been implemented for Schroder GAIA Sub-Funds since their inception.

On 30 September 2024, the last Calculation Day of the year under review, swing pricing adjustments were applied to Schroder GAIA Egerton Equity. The official Net Asset Values per Share of this sub-fund following the application of the swing pricing adjustment on that date are shown in the following table. All other financial information stated in this report is shown before any adjustments for swing pricing.

Notes to the Financial Statements as at 30 September 2024 (cont)

Swing Pricing (cont)

| | Currency | Schroder GAIA Egerton Equity |
|--|----------|---------------------------------|

^{*} The Net Asset Value per Share of each share class is stated in the currency of the share class.

Fair Value Pricing

 $\label{thm:continuous} The \ {\tt Directors}\ reserve\ the\ right\ to\ implement\ fair\ value\ pricing\ whenever\ they\ deem\ it\ appropriate.$

As at 30 September 2024, fair value adjustment was applied to the following securities:

| Sub-Fund | Security name | |
|--|--|--|
| Schroder GAIA Cat Bond | LionRock SideCar 2021-1 perpetual, ZCP | |
| Schroder GAIA Helix CFD on TRINITY LIMITED | | |
| Schroder GAIA Wellington Pagosa | clementia Pharmaceuticals | |
| | Credit Suisse Group perpetual, 7.25% | |
| | Credit Suisse Group perpetual, 7.50% | |
| | Credit Suisse Group perpetual, 7.50% | |

Taxation

The Company is not subject to any taxes in Luxembourg on income or capital gains.

The only tax to which the Company is subject is the 'taxe d'abonnement' at a rate of 0.05% per annum based on the Net Asset Value of each Sub-Fund at the end of the relevant quarter, calculated and paid quarterly.

In respect of any Share Class or Sub-Fund which comprises only institutional Investors (within the meaning of Article 174 of the Law of 17 December 2010 as amended), the tax levied will be at the rate of 0.01% per annum.

Interest and dividend income received by the Company may be subject to non-recoverable withholding tax in the source countries. The Company may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin, and provisions in this respect may be recognised in certain jurisdictions.

Management Fees

The Investment Managers are entitled to receive management fees for their services, which are calculated and accrued daily by reference to the Net Asset Value of the Sub-Funds and are paid monthly. No management fees are payable out of the net assets for I share classes, however the Investors are charged directly by Schroders. The actual rates payable for the year under review are set out in the following table:

| Sub-Funds | Share Class | Management Fee |
|---------------------------------------|-------------------|----------------|
| Schroder GAIA Asian Equity Long Short | | |
| | A Shares | 2.00% |
| | C and IZ Shares* | 1.00% |
| | E Shares | 0.75% |
| | X1 Shares | 0.85% |
| | I Shares | 0.00% |
| Schroder GAIA BlueTrend | | |
| | A Shares | 1.60% |
| | C, E and N Shares | 1.00% |

^{*} Management Fee for Schroder GAIA Asian Equity Long Short Share Classes C and IZ was reduced from 1.25% to 1.00% effective 1 January 2024.

These fees may be partially waived at the discretion of the Management Company.

Performance Fees

A performance fee becomes due in the event of outperformance, that is if the increase in the Net Asset Value per Share during the relevant performance year exceeds the High Water Mark, i.e. by reference to the highest Net Asset Value per Share at the end of any previous performance year (the High Water Mark).

A Share Class performance fee is accrued on each Business Day and included in the Net Asset Values of the Sub-Funds on the following Calculation Day, on the basis of the difference between the Net Asset Value per Share determined on the same Calculation Day (before deduction of any provision for the performance fee) and the hurdle, multiplied by the average number of Shares in issue over the financial year or in the case of a performance fee based on outperformance over a benchmark the higher of the Target Net Asset Value per Share (i.e. the hypothetical Net Asset Value per Share assuming a performance based on the benchmark until the Business Day) or the High Water Mark, multiplied by the average number of Shares in issue over the financial year. No performance fee is calculated for I Shares.

The Sub-Funds in relation to which performance fees were calculated during the year under review as well as details of the relevant Investment Managers and benchmarks are set out in the table below. Further details of the calculation of performance fees can be found in the current prospectus and the fees payable for the year are shown in the Statement of Net Assets under 'Performance fees payable'. Performance fees charged per share class during the year are shown on pages 146-147.

For Schroder GAIA Asian Equity Long Short, Schroder GAIA Contour Tech Equity, Schroder GAIA Egerton Equity, Schroder GAIA SEG US Equity and Schroder GAIA Two Sigma Diversified the performance fee is 20% of the outperformance.

For Schroder GAIA Helix, Schroder GAIA Sirios US Equity and Schroder GAIA Wellington Pagosa the performance fee is 20% of the outperformance (with the exception of E Shares where the rate is 15% of the outperformance).

For Schroder GAIA BlueTrend the performance fee is 10% of the outperformance.

For Schroder GAIA Cat Bond and Schroder GAIA Oaktree Credit no performance fee is charged (with the exception of Schroder GAIA Cat Bond PI Shares where the rate is 10% of the outperformance).

Distribution Fees

As at the date of this report, there is a distribution fee of 0.50% on all Schroder GAIA A1 Share Classes. There are no other distribution fees attributable to any other classes of Shares available for investment within the Company.

Custodian and Administration Fees

The Custodian and Fund Administrator are entitled to fees for related services rendered in accordance with common practice in Luxembourg, payable monthly, out of the net assets of the Sub-Fund.

Operating Expenses

The Sub-Funds pay other operating expenses incurred in the operation of the Company which are composed of statutory fees and are mainly audit, legal and publication fees, please refer to the 'Other Expenses' shown in the Statement of Operations.

Directors' Fees

Marie-Jeanne Chèvremont-Lorenzini was remunerated EUR 18,915 for the year under review. Bernard Herman was remunerated EUR 24,500 for the year under review. Eric Bertrand was remunerated EUR 26,500 for the year under review. Hugh Mullan was remunerated EUR 22,000 for the year under review. Yves Francis was remunerated EUR 18,636 for the year under review. The remaining directors have waived their remuneration.

Cash Collateral Reinvestment

For the purpose of counterparty risk mitigation, Sub-Funds with currency hedging transactions related to hedged Share Classes will pay or receive cash collateral on a daily basis from the counterparty, thus reducing their exposure over the duration of the forward contract.

The Investment Managers may reinvest the cash collateral they receive from their counterparty in connection with currency hedging.

Collateral receivable or payable at the maturity date of the forward contracts are shown in the Statement of Net Assets as 'Net Hedged currency class forward contracts collateral receivable/payable'. Collateral calls receivable or payable are shown in the Statement of Net Assets as 'Hedged currency class forward contracts collateral calls receivable/payable'.

Forward Foreign Exchange Contracts

Outstanding forward foreign exchange contracts were valued at the last available price at NAV Calculation Day, by reference to the forward rate of exchange applicable to the maturity of the relevant contract. The unrealised appreciation/(depreciation) is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on forward foreign exchange contracts'.

On 30 September 2024, the following Sub-Funds were committed to forward foreign exchange contracts:

Spot Trades

Outstanding spot trades were valued at the last available price at NAV Calculation Day, by reference to the spot rate of exchange to the maturity of the relevant contract. The unrealised appreciation/(depreciation) is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on spot trades'.

On 30 September 2024, the following Sub-Fund was committed to spot trades:

| Currency Bought | Amount Bought | Currency Sold | Amount Sold | Settlement Date | | Unrealised Appreciation/ (Depreciation) |
|------------------------|----------------|---------------|-------------|-----------------|-----|---|
| Schroder GAIA Two Sign | na Diversified | | | | | |

Option Contracts

Option contracts were valued at the last available price at NAV Calculation Day and the market value, if it is other than nil, is shown in the Statement of Net Assets under 'Options and swaptions at market value'.

On 30 September 2024, the following Sub-Funds were committed to outstanding option contracts on financial indices and international listed shares:

| Notional Subject to Call or Put | Contract | Counterparty | Currency | Premium Paid/ (Received) | Market Value | Unrealised Appreciation/ (Depreciation) |

Total Return Swap Contracts

The Sub-Funds may use total return swaps. A total return swap is a bilateral financial contract which allows them to enjoy all of the cash flow benefits of an asset without actually owning this asset (the 'Reference Asset'). The Sub-Funds will have to pay a periodic fee (fixed or floating payment) in exchange of their rights to receive the total return of the Reference Assets (coupons and/or capital gains and/or losses). The Reference Asset can be almost any asset, which constitutes an eligible investment for the Sub-Funds may use such instruments to seek exposure to an eligible market or for hedging purposes.

The total return swaps were valued at the last available price at NAV Calculation Day. The unrealised gain or loss on total return swaps at year-end is represented by the value of interest to be received (or paid), based on relevant swap agreements' interest rates less (or plus, respectively), the value of the performance to be paid (or received, respectively), based on the total return value of underlying assets, which is made up of the current fair value of equities plus the dividend distributed for such equities for the relevant swap year. The unrealised appreciation/(depreciation) is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on total return swap contracts'.

As at 30 September 2024, the following Sub-Funds were committed to total return swap contract agreements:

| Protection Position | Industry | Counterparty | Currency | Nominal Amount | Maturity Date | Unrealised Appreciation/ (Depreciation) |

Contracts for Differences

Contracts for differences ('CFDs') are valued based on the closing market price of the underlying security converted into the base currency of the contract, less any financing charges attributable to each contract which are booked separately. On entering a contract for difference, the Sub-Funds may be required to pledge an amount of cash and/or other assets to the broker which is equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margins' are made or received by the Sub-Funds periodically, depending on the fluctuations in the value of the underlying security. Realised gains or losses at the closure of the contract are equal to the difference between the value of the contract for difference at the time it was opened (including any financial changes) and the value at the time it was closed. Dividends (net of withholding taxes) attributable to open contracts are deemed to be dividends receivable at the end of the year. The result of these revaluations is shown in the Statement of Net Assets under 'Net unrealised appreciation/ (depreciation) on contracts for differences'.

As at 30 September 2024, the following Sub-Funds were entered into contracts for differences on financial indices and futures contracts:

| Contract | Complement | 0 | Market | Unrealised Appreciation/ |

Credit Default Index Swap Contracts

A credit default index swap allows the transfer of default risk. This allows a Sub-Fund to effectively buy insurance on a reference index obligation it holds (hedging the investment), or buy protection on a reference index obligation it does not physically own in the expectation that the credit will decline in quality. One party, the protection buyer, makes a stream of payments to the seller of the protection, and a payment is due to the buyer if there is a credit event (a decline in credit quality, which will be predefined in the agreement between the parties). If the credit event does not occur the buyer pays all the required premiums and the swap terminates on maturity with no further payments. The risk of the buyer is therefore limited to the value of the premiums paid. In addition, if there is a credit event and the Sub-Fund does not hold the underlying reference obligation, there may be market risk as the Sub-Fund may need time to obtain the reference index obligation and deliver it to the counterparty. Furthermore, if the counterparty becomes insolvent, the Sub-Fund may not recover the full amount due to it from the counterparty. The market for credit default indices may sometimes be more illiquid than the bond markets. The Company will mitigate this risk by monitoring in an appropriate manner the use of this type of transaction.

Credit default indices were valued at their intrinsic value. The valuation method involves the current value of the interest-rate series and the current value of the credit spread traded on the market at the closing date. The result of these revaluations together with any interest receivable/payable in relation to credit default index is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on credit default index swap contracts'.

On 30 September 2024, the following Sub-Funds were committed to credit default index swap agreements on financial indices:

| Protectio Position | n Description | Counterparty | Currency | Nominal Amount | Interest (Paid)/ Received % | Maturity Date | Unrealised Appreciation/ (Depreciation) |

Credit Default Swap Contracts

A credit default swap allows the transfer of default risk. This allows the Sub-Fund to effectively buy insurance on a reference obligation it holds (hedging the investment), or buy protection on a reference obligation it does not physically own in the expectation that the credit will decline in quality. One party, the protection buyer, makes a stream of payments to the seller of the protection, and a payment is due to the buyer if there is a credit event (a decline in credit quality, which will be predefined in the agreement between the parties). If the credit event does not occur the buyer pays all the required premiums and the swap terminates on maturity with no further payments. The risk of the buyer is therefore limited to the value of the premiums paid. In addition, if there is a credit event and the Sub-Fund does not hold the underlying reference obligation, there may be a market risk as the Sub-Fund may need time to obtain the reference obligation and deliver it to the counterparty. Furthermore, if the counterparty becomes insolvent, the Sub-Fund may not recover the full amount due to it from the counterparty. The market for credit default swaps may sometimes be more illiquid than the bond markets. The Company will mitigate this risk by monitoring in an appropriate manner the use of this type of transaction.

Credit default swaps were valued at their intrinsic value. The valuation method involves the current value of the interest-rate series and the current value of the credit spread traded on the market at the closing date. The result of these revaluations together with any interest receivable/payable in relation to credit default swaps is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on credit default swap contracts'.

On 30 September 2024, there were no Sub-Funds committed to credit default swap agreements.

Cross Currency Swap Contracts

The cross currency swaps were valued at the last available price at NAV Calculation Day. The unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation)' on cross currency swap contracts'. A cross currency swap is a contract by which two parties commit themselves during a given year to exchange interest payments denominated in two different currencies.

On 30 September 2024, the following Sub-Fund was entered into cross currency swap contracts:

| Counterparty | Paying Currency | Nominal | Receiving Currency | Nominal | Maturity | Paying Rate | Receiving Rate | Unrealised Appreciation/ (Depreciation) |
|------------------|--------------------|------------|-----------------------|-------------|-------------|-------------------|------------------------|---|
| Schroder GAIA We | llington Pagos | ia | | | | | | |
| Bank of America | USD | 11,346,865 | AUD | 17,022,000 | 19-Mar-2030 | USD SOFR 1 day | AUD BBR 3 months | 3,900 |
| Bank of America | USD | 11,363,460 | NOK | 122,764,000 | 19-Mar-2030 | USD SOFR 1 day | NOK NIBOR 3 months | 6,689 |

| Morgan Stanley | USD | 11,307,402 | NZD | 18,392,000 | 19-Mar-2030 | USD SOFR 1 day | NZD BBR 3 months | (4,327) |
| | | | | | | | USD | 12,991 |

Inflation Rate Swap Contracts

An inflation rate swap allows the transfer of inflation risk. One party to the contract seeks to reduce their risk (by hedging), while the other increases exposure to the risk (by speculating). The party looking to hedge their inflation risk pays the floating rate linked to an inflation index while receiving fixed cash flows. By swapping floating for fixed, it reduces the hedging party's exposure to inflation risk and increases their certainty of future cash flows. Inflation rate swaps were valued at the last available price at NAV Calculation Day. The unrealised appreciation/(depreciation) is disclosed in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation)' on inflation rate swap contracts'.

On 30 September 2024, the following Sub-Fund was committed to swap agreements on inflation rates:

| Nominal Amount | Currency | Counterparty | Security Description | Maturity Date | Unrealised Appreciation/ (Depreciation) |
|----------------------|--------------|----------------|---|---------------|---|
| Schroder GAIA Wellin | igton Pagosa | | | | |
| 1,945,000 | EUR | J.P. Morgan | Pay fixed 2.45%, Receive floating HICPX 10 year | 15-Feb-2033 | (105,438) |
| 5,529,000 | USD | J.P. Morgan | Pay fixed 2.63%, Receive floating USCPI 10 year | 15-Sep-2033 | (99,139) |
| 3,785,000 | EUR | J.P. Morgan | Receive fixed 2.48%, Pay floating HICPX 5 year | 15-Feb-2028 | 117,345 |
| 263,000 | USD | J.P. Morgan | Receive fixed 2.60%, Pay floating USCPI 5 year | 15-Sep-2028 | (2,007) |
| 5,406,000 | USD | J.P. Morgan | Receive fixed 2.61%, Pay floating USCPI 5 year | 15-Sep-2028 | 43,769 |
| 6,463,000 | EUR | Morgan Stanley | Pay fixed 2.40%, Receive floating HICPX 10 year | 15-Feb-2033 | (310,909) |
| 6,463,000 | EUR | Morgan Stanley | Receive fixed 2.40%, Pay floating HICPX 5 year | 15-Feb-2028 | 172,623 |
| | | | | USD | (183,756) |

Interest Rate Swap Contracts

In order to hedge against interest rate fluctuations, the Company may enter into interest rate swaps, provided:

- a) The commitments deriving therefrom do not exceed the value of the relevant assets to be hedged; and
- b) The total amount of such transactions does not exceed the level necessary to cover the risk of the fluctuation of the value of the assets concerned. Such contracts must be denominated in the currencies in which the assets of the Sub-Funds are denominated, or in currencies which are likely to fluctuate in a similar manner and must be either listed on an exchange or dealt in on a Regulated Market.

Interest rate swaps were valued at the last available price at NAV Calculation Day at their intrinsic value. The valuation method involves a current value of each interest rate and capital series converted into the currency of the Sub-Fund on the closing date. The result of these revaluations together with any interest receivable/payable in relation to interest rate swaps is shown in the Statement of Net Assets under 'Net unrealised appreciation/(depreciation) on interest rate swap contracts'.

On 30 September 2024, the following Sub-Funds were committed to swap agreements on interest rates:

| Description | Counterparty | Nominal | Currency | Maturity Date | Unrealised Appreciation/ (Depreciation) |
|--|--------------|-------------|----------|---------------|---|
| Schroder GAIA BlueTrend | | | | | |

Disclosure of Transaction Costs

The transaction costs are broker commission fees and taxes related to the purchase and sale of transferable securities. Bond Sub-Funds will generally show the figure of zero as the broker commission fees are included in the spread, which is excluded from the calculation pursuant to Annex I, Schedule B, Chapter V of Directive 2009/65/EC of the European Parliament. The transaction costs part of the acquisition cost/sale price of the related assets and the Custodian transaction costs are not included in this table. Costs for structured products are included in the market value.

The transaction costs for the year under review were as follows:

| Sub-Funds | Currency | Transaction Costs |
|---------------------------------------|----------|----------------------|
| Schroder GAIA Asian Equity Long Short | USD | 81,401 |
| Schroder GAIA BlueTrend | USD | 145,088 |

Cross Sub-Fund investment

As at 30 September 2024, the total cross Sub-Fund investment amounts to EUR 10,499,933 and therefore, the total combined NAV at the year end without cross Sub-Fund investments would amount to EUR 5,750,293,556. The details of the cross Sub-Fund investments are disclosed in the following table:

| Investment | Sub-Fund Currency | Market Value | % of net assets |
|---------------------------------------|-------------------|-----------------|-----------------|
| Schroder GAIA Helix | | | |
| Schroder GAIA Asian Equity Long Short | | 11,688,000 | 3.81 |
| | USD | 11,688,000 | 3.81 |

Changes in the Sub-Funds

A list, specifying the total purchases and sales for each Sub-Fund, which took place during the year under review may be obtained free of charge upon request at the registered office of the Company.

Exchange Rate

The exchange rate used for the calculation of the combined total in EUR of the Financial Statements as at 30 September 2024 is:

1 Euro = 1.11315 US Dollar

Notes to the Financial Statements as at 30 September 2024 (cont)

Subsequent Events

1. New share classes

The following share classes were made available after the year under review:

| Sub-Fund and Share Class | Share Class Currency | Sub-Fund Base Currency | Launch Date |
|--------------------------|-------------------------|---------------------------|-----------------|
| Schroder GAIA Cat Bond | | | |
| Class Y5 Acc | USD | USD | 25 October 2024 |
| Class Y5 Acc CHF Hedged | CHF | USD | 25 October 2024 |
| Class Y5 Acc EUR Hedged | EUR | USD | 25 October 2024 |

| Class Y5 Dis | USD | USD | 25 October 2024 |
| Class Y5 Dis GBP Hedged | GBP | USD | 25 October 2024 |

2. Share class liquidations

The following share classes were liquidated after the year under review:

| Sub-Fund and Share Class | Share Class Currency | Sub-Fund Base Currency | Liquidation Date |
|--------------------------|-------------------------|---------------------------|------------------|
| Schroder GAIA Helix | | | |
| Class A Acc CHF Hedged | CHF | USD | 28 October 2024 |
| Class A Acc SGD Hedged | SGD | USD | 28 October 2024 |
| Class C1 Acc | USD | USD | 28 October 2024 |
| Class I Acc JPY Hedged | JPY | USD | 28 October 2024 |

3. Significant Events After the Year

Hurricane Milton ("Milton") formed in the western Gulf of Mexico and moved eastwards as a Category 5 storm before turning northeast towards Florida and the Tampa Bay area. Milton made landfall on 9 October 2024 as a Category 3 storm near Siesta Key in Florida and traversed the Florida peninsula north-eastwards as a Category 1 storm. The impact of Milton on the Sub-Fund GAIA Cat Bond was insignificant, with a decline of less than 1% in asset value.

Appendix I – UCITS Disclosures (Unaudited) (cont)

UCITS remuneration disclosures for Schroder Investment Management Europe S.A. ('SIM Europe') for the year to 31 December 2023

These disclosures form part of the non-audited section of this annual report and accounts and should be read in conjunction with the Schroders plc Remuneration Report on pages 74 to 93 of the 2023 Annual Report & Accounts (available on the Group's website www.schroders.com/ir) which provides more information on the activities of our Remuneration Committee and our remuneration principles and policies.

The UCITS Material Risk Takers ('UCITS MRTs') of SIM Europe are individuals whose roles within the Schroders Group can materially affect the risk of SIM Europe or any UCITS fund that it manages. These roles are identified in line with the requirements of the UCITS Directive and guidance issued by the European Securities and Markets Authority.

The Remuneration Committee of Schroders plc has established a remuneration policy to ensure the requirements of the UCITS Directive are met for all UCITS MRTs. The Remuneration Committee and the Board of Schroders plc review remuneration strategy at least annually. The directors of SIM Europe are responsible for the adoption of the remuneration policy and periodically reviewing its implementation in relation to SIM Europe. During 2023 the Remuneration Policy was reviewed to ensure compliance with the UCITS/AIFMD remuneration requirements and no significant changes were made.

The implementation of the remuneration policy is, at least annually, subject to independent internal review for compliance with the policies and procedures for remuneration adopted by the Board of SIM Europe and the Remuneration Committee. The most recent review found no fundamental issues but resulted in minor recommendations relating to policy documentation.

Our ratio of operating compensation costs to net operating income guides the total spend on remuneration each year. This is recommended by the Remuneration Committee to the Board of Schroders plc. This approach aligns remuneration with Schroders financial performance. In determining the remuneration spend each year, the underlying strength and sustainability of the business is taken into account, along with reports on risk & compliance, legal and internal audit matters from the heads of those areas.

The remuneration data that follows reflects amounts paid in respect of performance during 2023.

- The total amount of remuneration paid by SIM Europe to its 342 staff was €57.71 million of which €40.07 million was fixed remuneration (e.g. salaries, benefits in kind) and €17.64 million was variable remuneration (e.g. annual bonus awards or deferred bonus awards). Employees of other Schroders Group entities who serve as Directors of SIM Europe receive no additional fees in respect of their role on the Board of SIM Europe.
- The following disclosures relate to UCITS MRTs of SIM Europe. Most of those UCITS MRTs were employed by other Schroders group companies, including as a result of delegation by SIM Europe of investment management or other responsibilities to other Schroders group entities or third parties. Many of those UCITS MRTs provide services to other Schroders group companies and other clients. In the interests of transparency, the aggregate remuneration figures that follow reflect the full remuneration for each SIM Europe UCITS MRT. The aggregate total remuneration paid to the 237 UCITS MRTs of SIM Europe in respect of the financial year ended 31 December 2023, and attributed to SIM Europe or the UCITS funds that it manages, is €177.70 million, of which €51.24 million was paid to senior management, €123.80 million was paid to MRTs deemed to be taking risk on behalf of SIM Europe or the UCITS funds that it manages and €2.64 million was paid to other UCITS MRTs including control function MRTs. Those total remuneration values include amounts paid by delegates where available.

For additional qualitative information on remuneration policies and practices see www.schroders.com/rem-disclosures.

The Sub-Funds engage in Securities Financing Transactions (SFT) (as defined in Article 3 of Regulation (EU) 2015/2365, securities financing transactions include repurchase transactions, securities or commodities lending and securities or commodities borrowing, buy-sell back transactions or sell-buy back transactions and margin lending transactions). In accordance with Article 13 of the Regulation, the Sub-Fund involvement relating to their exposure on total return swaps for the year ended 30 September 2024 is detailed below:

Schroder GAIA Egerton Equity

Global Data

Amount of assets engaged in total return swaps

| Amount of Assets - Long Positions EUR | % of AUM |

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Schroder GAIA Cat Bond

Legal Entity Identifier: 549300MYKDUYVX3W6F39

Environmental and/or social characteristics

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

| Did this financial product have a sustainable investment objective? | | | | |
|---|---|----|-------------------|---|
| •• | Yes | •• | X | No |
| | It made sustainable investments with an environmental objective:% | | chara as its o | moted Environmental/Social (E/S) cteristics and while it did not have objective a sustainable investment, a proportion of% of sustainable ments |
| | in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy |
| | in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| | | | | with a social objective |
| | It made sustainable investments with a social objective :% | X | • | noted E/S characteristics, but did ake any sustainable investments |

The **EU Taxonomy**

is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met. The Fund invested:

- at least 80% of its assets in investments linked to natural catastrophe and/or life risks with an aim of reducing the negative consequences of such events, contributing to the rebuilding of economies and societies post event and hence increasing their resilience going forward;
- at least 50% of its assets in investments linked to meteorological risks with an aim of reducing the negative consequences of such events, contributing to the rebuilding of economies and societies post event and hence increasing their resilience going forward, and potentially easing the negative consequences of climate change;
- at least 5% of its assets in investments that are designed to address the unavailability of affordable insurance cover against natural catastrophes.

The Fund also maintained a positive absolute sustainability score, based on the Investment Manager's rating system.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool.

The reference period for this Fund is 1 October 2023 to 30 September 2024.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

• How did the sustainability indicators perform?

The Investment Manager monitored compliance with the characteristic to invest at least: 80% of its assets in investments linked to natural catastrophe and/or life risks; 50% of its assets in investments linked to meteorological risks; and 5% of its assets in investments that are designed to address the unavailability of affordable insurance cover against natural catastrophes by using a third-party operating system for investment professionals with oversight provided by an internal portfolio compliance team.

The positive absolute sustainability score of the Fund for the reference period was 0.7%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Education: the estimated societal benefits of a country's education spend per school age capita;
- Financial Inclusion: the estimated societal benefits from the provision of financial services on local populations. Assigned in proportion to company market share of global revenue;
- High Salaries: the estimated societal benefit of paying staff above local living wage (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global subsector revenue; and
- Socio-Political Stability: the estimated societal benefit a politically and socially stable country can provide in supporting a favourable business environment and attracting investment, thus contributing to long-run economic growth.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainability score

This table details the Fund's sustainability score, year on year

| Period | Fund (%) |
|---------------------|-------------|
| Oct 2023 - Sep 2024 | 0.7 |
| Oct 2022 - Sep 2023 | 0.9 |
| Oct 2021 - Sep 2022 | 0.8 |

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

This question is not applicable for this Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

This question is not applicable for this Fund.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As stated in the pre-contractual disclosure for the Fund, currently, the Investment Manager is not able to consider the principal adverse impacts on sustainability factors as these metrics only apply to investments in companies, sovereign debt and real estate.

Due to the nature of the Fund's assets, being insurance-linked securities and financial derivative instruments that are exposed to catastrophe risks, the Investment Manager could only consider adverse impacts applicable to this asset class. The Investment Manager has excluded certain transaction sponsors and certain risk classes from inclusion in its portfolios that the Investment Manager believes have the potential to cause significant adverse impacts on society.

The Fund has also excluded ILS transactions that are sponsored by the following companies on a standalone basis:

- Environmental: Companies that are active in fossil fuels extraction and production (including but not limited to oil drilling and coal mines) or power generation from oil and gas.
- Social: Companies from the following sectors: Alcohol, Tobacco, Gambling, Adult Entertainment, Conventional Weapons, Civilian Firearms, and Nuclear Weapons.

Further, the Fund has excluded certain risk classes from inclusion into its portfolio: lottery, mortgage insurance, life settlements and terror on a stand-alone basis.

What were the top investments of this financial product?

During the reference period the top 15 investments were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Oct 2023 to 30 Sep 2024

Due to the structure of these assets the 'Country' shown in the table above represents the domicile of the investment vehicle. The country risk exposures of the underlying investments will generally differ from the country of domicile.

The 'Sector' shown represents the fact these are special purpose vehicles created for the purpose of risk mitigation.

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The largest investments and % of assets referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of assets detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be marginal differences in the largest investments and % of assets due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

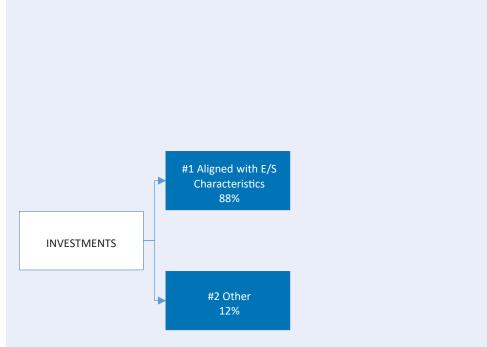

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 88%. This percentage represents the assets in investments linked to natural catastrophe and/or life risks, investments linked to meteorological risks and investments that are designed to address the unavailability of affordable insurance cover against natural catastrophes and is based on the average of the holdings at each quarter-end during the reference period.

#2 Other includes cash which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors:

| Sector | Sub-Sector | % Assets |
|---------------|----------------|----------|
| Financial | Insurance | 86.43 |
| Cash | Cash | 8.61 |
| Treasuries | Treasuries | 3.79 |
| Supranational | Supranational | 1.18 |
| Derivatives | FX Derivatives | -0.01 |

The list above represents the average of the Fund's holdings at each quarter-end during the reference period.

The % of assets aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of assets aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABOR) maintained by the administrator. As a result of these differing data sources, there may be marginal

No

X

differences in the % of assets aligned to economic sectors due to the differing calculation methodologies of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

| • Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹? | | | |
|--|--|-------------------|--|
| Yes: | | | |
| In fossil gas | | In nuclear energy | |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

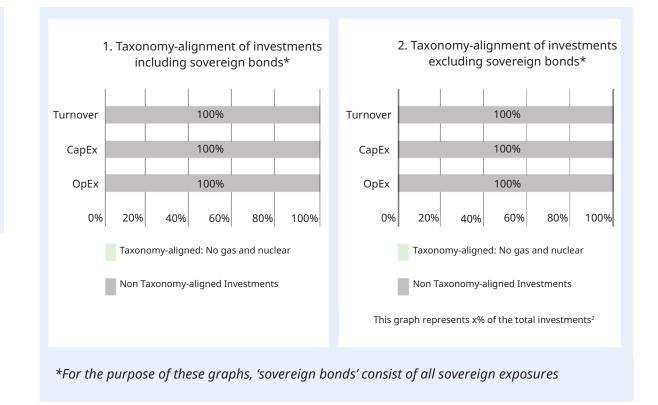

Taxonomy-aligned activities are expressed as a share of:

- **turnover**reflecting the share
of revenue from
green activities of
investee companies

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that there is no need to mention this information.

• What was the share of investments made in transitional and enabling activities?

As per the above, the share of investments by the Fund in transitional and enabling activities has been deemed to constitute 0% of the Fund's portfolio.

directly enable other activities to make a substantial contribution to an environmental objective

Enabling activities

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund did not commit to making sustainable investments, this question is not applicable for this Fund.

What was the share of socially sustainable investments?

As the Fund did not commit to making sustainable investments, this question is not applicable for this

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes cash which was treated as neutral for sustainability purposes. #2 also includes other investments that were not scored by Schroders' proprietary sustainability tool and so did not contribute towards the Fund's sustainability score.

Minimum safeguards were applied where relevant to Money Market Instruments, derivatives used with the aim of reducing risk (hedging) or other investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firm-wide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period, to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability scores of the Fund and of individual investments when selecting the assets held by the Fund; and
- The Investment Manager assessed good governance practices of the Fund's investments.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics

that they promote.

No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

This question is not applicable.

 How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This question is not applicable.

• How did this financial product perform compared with the reference benchmark?

This question is not applicable.

• How did this financial product perform compared with the broad market index?

This question is not applicable.

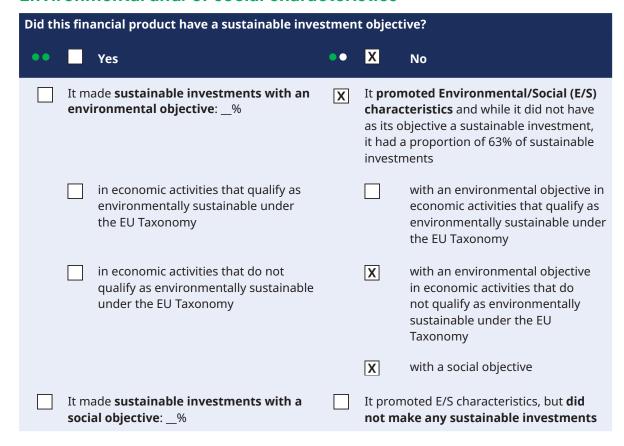

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: Schroder GAIA Helix

Legal Entity Identifier: 549300HTRQHGX6XKWC51

Environmental and/or social characteristics

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The percentage of sustainable investments shown (which are all long positions, as short positions are not deemed to be sustainable investments) represents the sustainable investments as a proportion of the long exposure of the Fund during the reference period. This is in line with the pre-contractual disclosure for the Fund, where the Fund committed to invest at least 35% of its long exposure in sustainable investments.

For additional context, the percentage of sustainable investments as a proportion of the gross exposure of the Fund during the reference period was 31%. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the other calculations in the asset allocation section below.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Fund were met. The Fund maintained a positive absolute sustainability score, based on the Investment Manager's rating system.

The sustainability score is measured by Schroders' proprietary tool that provides an aggregate estimate of the social and environmental costs and benefits that an issuer may create. It does this by scoring the issuer against a list of indicators – scores may be positive (for example, when an issuer pays more than average living wages) or negative (for example, when an issuer emits carbon). It does this using third party data as well as Schroders' own estimates and assumptions and the outcome may differ from other sustainability tools and measures.

The result is expressed as an aggregate score of the sustainability indicators for each issuer, specifically a notional percentage (positive or negative) of sales or GDP of the relevant underlying issuer. For example, a score of +2% would mean that for every \$100 of sales or GDP the issuer generates, it would provide a net positive contribution to society and/or the environment of \$2. The sustainability score of the Fund is derived from the scores of all eligible issuers in the Fund's portfolio measured by Schroders' proprietary tool. The Fund's long and short positions contribute differently to the aggregate score. Long positions with positive scores and short positions with negative scores both contribute positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detract from the aggregate score.

The Fund used derivatives extensively to implement its investment strategy and to meet the environmental and/or social characteristics promoted by the Fund. Long and short derivative positions contributed differently to the Fund's overall sustainability score as described. Equity and index derivatives (excluding options) are scored in the same way as physical holdings, on a look-through basis, and also contributed to the Fund's overall sustainability score.

The Fund also invested at least 35% of its long exposure in sustainable investments during the reference period.

The reference period for this Fund is 1 October 2023 to 30 September 2024.

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The positive absolute sustainability score for the reference period was 7.1%. This means that the Fund's weighted average score over a rolling six month period up to the end of the reference period was higher than zero, based on month-end data.

The sustainability score is calculated as described above.

During the reference period, the top 5 indicators in Schroders' proprietary tool that contributed positively to the sustainability score of the Fund were:

- Avoided Emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions;
- Carbon Emissions Scope 1: the estimated environmental costs of Scope 1 greenhouse gas (GHG) emissions on climate change. Scope 1 emissions represent the direct emissions within a company's organisational boundary;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue; and
- Higher Salaries: the estimated societal benefit of companies over-paying staff relative to local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage;
- Tobacco: the estimated societal cost of smoking (assigned to tobacco producers). Assigned in proportion to company market share of global revenue.

Tobacco and Carbon Emissions Scope 1 are societal and environmental costs respectively (and therefore were scored negatively) yet contributed positively to the sustainability score of the Fund because they represent short positions, and short positions with negative scores contribute positively towards the aggregate sustainability score of the Fund.

The Fund committed to invest at least 35% of its long exposure in sustainable investments by reference to the sustainability score of each asset in Schroders' proprietary tool and in line with this commitment the Fund invested 63% of its long exposure in sustainable investments (which are all long positions, as short positions are not deemed to be sustainable investments) during the reference period, based on quarter-end data.

For additional context, during the reference period and based on quarter-end data, the Investment Manager invested 31% of the Fund's gross exposure in sustainable investments. This represents the percentage of sustainable investments as a proportion of the gross exposure of the Fund. The gross exposure includes both long and short positions and this figure is provided for consistency with the basis of the calculations in the asset allocation section below.

The Fund also applied certain exclusions, with which the Investment Manager monitored compliance on an ongoing basis via its portfolio compliance framework.

• ...and compared to previous periods?

Sustainable investments

This table details the percentage of assets invested in sustainable investments, year on year.

| Period | Fund % (Gross) | Fund % (Long) |
|---------------------|-------------------|------------------|
| Oct 2023 - Sep 2024 | 31 | 63 |
| Oct 2022 - Sep 2023 | 28 | 55 |
| Oct 2021 - Sep 2022 | 26 | 52 |

Sustainability score

This table details the Fund's sustainability score, year on year

| Period | Fund (%) |
|---------------------|-------------|
| Oct 2023 - Sep 2024 | 7.1 |
| Oct 2022 - Sep 2023 | 9.8 |
| Oct 2021 - Sep 2022 | 8.8 |

For the first period, the percentage of sustainable investments was calculated as at the end of the reference period. From October 2022 the percentage is calculated as an average based on quarter-end data.

• What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In respect of the proportion of the Fund's long portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool.

The objectives of the sustainable investments that the Fund made included, but were not limited to:

- Avoided emissions: the estimated environmental benefits of companies that enable system-or economy-wide reductions in carbon emissions.
- Connectivity: the estimated societal benefits from companies that enable and/or support the connection of communities through telecommunication services. Assigned in proportion to the estimated global benefit of access to global communication technologies and attributing that benefit to individual companies based on their share of global revenues from telecommunication and internet connectivity markets, including social media companies;
- Contraception: the estimated societal benefits attained from the production and supply of contraceptives. Assigned in proportion to company market share of global revenue;
- Higher Salaries: the estimated societal benefit of companies over-paying staff relative to local living wages (for regions in which they operate). Assigned in proportion to the surplus companies are paying employees compared to the average living wage; and

- Medicine: the estimated societal benefits arising from the additional social value the sale of such products and services exhibits of the wider economy. Assigned in proportion to the company's involvement in the healthcare value chain and proportion of company market share to global subsector revenue.

The above examples of the objectives of the sustainable investments that the Fund made during the reference period, are based on the most significant objectives at each quarter-end. Other objectives may have applied during the reference period.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

• How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager's approach to not causing significant harm to any environmental or social sustainable investment objective included the following:

Across all periods

- Firm-wide exclusions applied to Schroders funds. These relate to international conventions on cluster munitions, anti-personnel mines, and chemical and biological weapons. A detailed list of all companies that are excluded is available at https://www.schroders.com/en/sustainability/activeownership/group-exclusions/

Further information on all of the Fund's exclusions is to be found under "Sustainability-related disclosures" on the Fund's webpage, accessed via https://www.schroders.com/en-lu/lu/individual/fundcentre.

From 1 October 2023 - 21 November 2023

- Schroders became a signatory to the UN Global Compact (UNGC) principles on 6 January 2020. The Fund excluded companies in violation of the UNGC principles from the portion of the portfolio in sustainable investments, as Schroders considers violators cause significant harm to one or more environmental or social sustainable investment objectives. The areas determining whether an issuer is an UNGC violator include issues that are covered by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, such as human rights, bribery and corruption, labour rights, child labour, discrimination, health and safety, and collective bargaining. The list of UNGC violators was provided by a third party and compliance with the list monitored via our automated compliance controls. Exceptions may apply, if there was evidence to demonstrate that the company has addressed the violation and is not causing significant harm as described above.
- Where relevant, although not applied at the Fund level, at the underlying strategy level, companies that derived revenues above certain thresholds from activities related thermal coal, thermal coal mining and coal fired power generation were excluded from long exposure.

From 22 November 2023 - 16 July 2024

- The Fund excludes companies from sustainable investments that are assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprise Schroders' 'global norms' breach list. Schroders' determination of whether a company has been involved in such a breach considers relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the

UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

– The Fund excluded companies that derive revenues above certain thresholds from activities related to tobacco and thermal coal from sustainable investments.

From 17 July 2024 - 30 September 2024

- In line with firmwide exclusions and their thresholds, the Fund excluded companies, from its long exposure, that generate a significant proportion of their revenue from thermal coal mining.
- Incrementally, the Fund excluded companies, from its long exposure, that derive revenues above certain thresholds from activities related to tobacco and thermal coal
- -The Fund excluded companies, from its long exposure, that were assessed by Schroders to have breached one or more 'global norms' thereby causing significant environmental or social harm; these companies comprised Schroders' 'global norms' breach list. Schroders' determination of whether a company had been involved in such a breach considered relevant principles such as those contained in the UN Global Compact (UNGC) principles, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. The 'global norms' breach list may be informed by assessments performed by third party providers and by proprietary research, where relevant to a particular situation.

How were the indicators for adverse impacts on sustainability factors taken into account?

When seeking to identify significant harm, Schroders' approach to taking into account the Principal Adverse Impacts (PAI) indicators involved taking both a quantitative and a qualitative assessment. Investee companies deemed not to satisfy the quantitative thresholds would generally have been excluded, unless on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Where it was not considered appropriate or feasible to set quantitative thresholds, the Investment Manager engaged, where relevant, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy.

This framework is subject to ongoing review, particularly as the availability and quality of the data evolves.

Our approach included:

- 1. Quantitative: this included indicators where specific thresholds have been established:
- Via the application of exclusions. This approach is relevant to PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) for the Fund's long exposure and PAI 14 (Exposure to controversial weapons) for the Fund's long and short exposure. Further, the following PAIs were assessed as part of Schroders 'global norms' breach list exclusion (which seeks to exclude companies where significant harm is occurring) which apply to the Fund's long exposure: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises and Voluntary) and PAI 14 in Table 3 (Number of identified cases of severe human rights issues and incidents).

- Via the application of an alert system flag if the relevant indicator(s) exceeded a threshold. These quantitative thresholds to assess significant harm are established centrally by our Sustainable Investment team and monitored systematically. This approach applies to indicators where we have segmented the population into harm groups to establish a threshold, such as carbon related PAI metrics, PAI 1 (GHG emissions), PAI 2 (Carbon footprint) and Voluntary PAI 4 in Table 2 (Investing in companies without carbon emission reduction initiatives). PAI 3 (GHG intensity of investee companies) operates in a similar way but the threshold is based on a revenue metric. A threshold for PAI 6 (Energy consumption intensity per high impact climate sector) is established based on the above mentioned carbon measures. A similar approach has been taken for PAI 15 (GHG intensity). PAI 16 (Investee countries subject to social violations) also operates in the same way but based on data availability regarding social violations. Through this process the relevant issuer(s) that were deemed not to satisfy the quantitative thresholds were flagged to the Investment Manager for consideration, whose response may have involved selling the holdings(s) or maintaining the position if on a case-by-case basis the data was deemed not representative of a company's performance in the relevant area. Investee companies deemed to cause significant harm were excluded from the long exposure of the Fund.

2. Qualitative: This included PAI indicators where Schroders' believed that the data available did not enable us to make a quantitative determination regarding whether significant harm was done so as to warrant excluding an investment. In such cases, the Investment Manager engaged where possible with the company or companies held, in accordance with the priorities documented in Schroders' Engagement Blueprint and/or voting policy. This approach applies to indicators such as PAI 12 (Unadjusted gender pay gap) and PAI 13 (Board gender diversity), where we engaged and used our voting rights where we considered appropriate. Both board gender diversity and disclosure of gender pay gap information are captured in our Engagement Blueprint.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The portion of the portfolio in sustainable investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Companies on Schroders' 'global norms' breach list were not categorised as sustainable investments. Schroders' determination of whether a company should be included on such list considered the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, among other relevant principles. The 'global norms' breach list was informed by third party providers and proprietary research, where relevant.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

From 1 October 2023 - 16 July 2024

The Investment Manager's approach to considering principal adverse impacts on sustainability factors involved classifying the indicators into three categories:

- 1. Set thresholds: this involved very explicit thresholds for considering an investment to be a "sustainable investment". For example, PAI 10 on violations of UNGC principles.
- 2. Active ownership (indirectly via managers of underlying strategies): this involved indicators on which we had a plan to engage with the underlying holding as set out in the Schroders Group document outlining our approach to active ownership. For example, PAI 1, 2 and 3 covering GHG emissions and PAI 13 on board gender diversity.
- 3. Improve coverage (indirectly via managers of underlying strategies): this involved indicators where we considered data coverage to be too sparse to take action and our focus was primarily on engaging with the underlying holdings to increase reporting. For example, PAI 7 on biodiversity, PAI 9 on hazardous waste ratio and PAI 12 on the gender pay gap.

From 17 July 2024 - 30 September 2024

The Fund allocated its assets across multiple underlying strategies. Some PAIs were considered at the Fund level, whilst other PAIs were considered at the level of the underlying strategies by the relevant investment manager where applicable. Further details on how these have been considered during the reference period are detailed below.

Some PAIs were considered as part of pre-investment through the application of exclusions. These included:

- Controversial weapons: PAI 14 (Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)) applied to long and short exposures
- Schroders' 'global norms' breach list, which covers: PAI 7 (Activities negatively affecting biodiversity-sensitive areas), PAI 8 (Emissions to water), PAI 9 (Hazardous waste and radioactive waste ratio), PAI 10 (Violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises), PAI 11 (Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises) and PAI 16 (Investee countries subject to social violations) applied to long exposures.
- Companies that derive revenues above certain thresholds from activities related to thermal coal: (PAI 4 (Exposure to companies active in the fossil fuel sector), PAI 5 (Share of non-renewable energy consumption and production) applied to long exposures .

Compliance with these thresholds was monitored via the Investment Manager's portfolio compliance framework.

Other PAIs were considered via active ownership, which was performed indirectly via the underlying investment managers. Where applicable, based on the underlying strategies and the relevant investment manager's own investment process, PAIs were considered post-investment through

engagement in line with the approach and expectations set out in Schroders Engagement Blueprint. Priority topics considered via our Engagement Blueprint include:

- Climate Change
- Natural Capital and Biodiversity
- Human Rights
- Human Capital Management
- Diversity and Inclusion
- Corporate Governance

Examples of PAIs captured via this approach included PAI 1 (GHG emissions, PAI 2 (Carbon footprint), PAI 3 (GHG intensity of investee companies) and PAI 13 (Board gender diversity).

A summary of the Fund's engagement activity during the reference period, including the relevant engagement theme, is shown below

| Engagement Theme | # Issuers |
|----------------------------------|-----------|
| Climate Change | 53 |
| Corporate Governance | 35 |
| Human Rights | 10 |
| Human Capital Management | 10 |
| Natural Capital and Biodiversity | 10 |
| Diversity and Inclusion | 8 |

Our approach is subject to ongoing review, particularly as the availability, and quality, of PAI data evolves.

What were the top investments of this financial product?

During the reference period the top 15 investments, based on net exposure (as a % of NAV), were:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 Oct 2023 to 30 Sep 2024

| Largest Investments | Sector | % Assets (Net) | Country |
|---------------------------------------|---------------------------|-------------------|---|
| SAMSUNG ELECTRONICS | Information Technology | 1.93 | Korea (South), |
| MEDIATEK | Information Technology | 1.63 | Republic of Taiwan (Republic of China) |
| CONTEMPORARY AMPEREX TECHNOLOGY | Industrials | 1.41 | China |
| NOVA LJUBLJANSKA BANKA DD LJUBLJANA | Financials | 1.36 | Slovenia |
| TAIWAN SEMICONDUCTOR MANUFACTURING | Information Technology | 1.27 | Taiwan (Republic of China) |
| SHENZHOU INTERNATIONAL | Consumer Discretionary | 1.18 | China |
| ALPHABET | Communication Services | 1.09 | United States |
| SAMSUNG FIRE & MARINE INSURANCE | Financials | 1.08 | Korea (South), Republic of |
| TRIP.COM GROUP | Consumer Discretionary | 1.05 | China |
| SAP | Information Technology | 1.02 | Germany |
| DBS GROUP HOLDINGS | Financials | 1.01 | Denmark |
| SCHNEIDER ELECTRIC | Industrials | 1.01 | France |
| RELX | Industrials | 0.97 | United Kingdom |
| RIO TINTO | Materials | 0.96 | United Kingdom |
| BHP GROUP | Materials | 0.95 | Australia |

The list above represents the average of the Fund's net exposure as a % of NAV at each quarter-end during the reference period.

Exposures have been provided on a look through basis for index futures, index options, total return swaps (TRS) positions and contract for difference (CFD) baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

The largest investments and % of NAV referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The largest investments and % of NAV detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the largest investments and % of NAV due to the differing calculation methodologies of these alternative data sources.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

• What was the asset allocation?

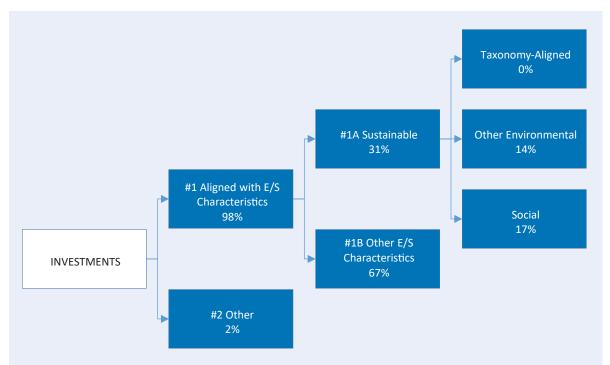

The Fund's investments that were used to meet its environmental or social characteristics are summarised below.

#1 Aligned with E/S characteristics includes the Fund's assets that were used to attain the environmental or social characteristics, which is equal to 98% of gross exposure. The Fund maintained a

positive absolute sustainability score, and so the Fund's investments (both long and short) that were scored by Schroders' proprietary sustainability tool are included within #1 on the basis that they contributed to the Fund's sustainability score (whether such individual investment had a positive or a negative score). Long positions with positive scores and short positions with negative scores both contributed positively towards the aggregate score, while long positions with negative scores and short positions with positive scores both detracted from the aggregate score. The percentage in #1 Aligned E/S characteristics represents the average during the reference period, based on quarter-end data. Also included within #1 is the proportion of gross exposure that was invested in sustainable investments, as indicated in #1A.

During the reference period, the Fund invested 31% of its gross exposure in sustainable investments. This percentage represents the average during the reference period, based on quarter-end data. The gross exposure includes both long and short positions but the percentage only includes long positions as short positions are not deemed to be sustainable investments. Within this, 14% was invested in sustainable investments with an environmental objective and 17% was invested in sustainable investments with a social objective. However, the Fund committed to invest at least 35% of its long positions in sustainable investments. During the reference period the Fund invested 63% of its long exposure in sustainable investments. Within this, 28% was invested in sustainable investments with an environmental objective and 34% was invested in sustainable investments with a social objective. The percentage of sustainable investments with an environmental objective and the percentage of sustainable investments with a social objective may not sum to the percentage of sustainable investments, due to rounding. In respect of the proportion of the Fund's portfolio that was invested in sustainable investments, each sustainable investment demonstrated a net positive effect across a range of environmental or social objectives, as scored by Schroders' proprietary tool. With the exception of any green or social bonds, which will be classified as having an environmental and social objective respectively, a sustainable investment is classified as having an environmental or social objective depending on whether the relevant issuer has a higher score in Schroders' proprietary tool relative to its applicable peer group for its environmental indicators or its social indicators. In each case, indicators are comprised of both "costs" and "benefits".

#2 Other includes investments that are not scored by Schroders' proprietary sustainability tools and so do not contribute towards the Fund's sustainability score. Cash and cash equivalents are excluded from #2 Other due to the long / short nature of the Fund's investment strategy.

#1 Aligned with E/S Characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments

The category **#1 Aligned with E/S Characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S Characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

The percentages shown above are calculated as a proportion of gross exposure for consistency purposes. However, the Fund committed to invest at least 35% of its long exposure in sustainable investments and during the reference period the Fund invested 63% of its long positions in sustainable investments.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used. This netting was applied before determining whether an exposure was long or short, and before calculating the gross exposure.

• In which economic sectors were the investments made?

During the reference period investments were made in the following economic sectors, based on gross and net exposure (as a % of NAV):

| Sector | Sub-Sector | % Assets (Net) | % Assets (Gross) |
|-----------------------------------|--|-------------------|---------------------|
| Communication Services | Media & Entertainment | 2.14 | 11.69 |
| Communication Services | Telecommunication Services | -1.01 | 5.85 |
| Consumer Discretionary | Automobiles & Components | -2.28 | 8.62 |
| Consumer Discretionary | Consumer Discretionary Distribution & Retail | -3.65 | 11.85 |
| Consumer Discretionary | Consumer Durables & Apparel | 3.82 | 12.74 |
| Consumer Discretionary | Consumer Services | 0.69 | 12.37 |
| Consumer Staples | Consumer Staples Distribution & Retail | -0.38 | 6.63 |
| Consumer Staples | Food, Beverage & Tobacco | -3.28 | 9.61 |
| Consumer Staples | Household & Personal Products | -0.51 | 3.42 |
| Energy | Energy | -1.15 | 10.85 |
| Financials | Banks | -1.57 | 35.91 |
| Financials | Financial Services | 0.03 | 16.09 |
| Financials | Insurance | 0.13 | 11.16 |
| Health Care | Health Care Equipment & Services | 0.74 | 8.41 |
| Health Care | Pharmaceuticals, Biotechnology & Life Sciences | -1.04 | 10.27 |
| Index | Index | 1.09 | 5.80 |
| Industrials | Capital Goods | 3.71 | 38.77 |
| Industrials | Commercial and Professional Services | 0.37 | 8.07 |
| Industrials | Transportation | -0.59 | 9.62 |
| Information Technology | Semiconductors & Semiconductor Equipment | 1.82 | 14.14 |
| Information Technology | Software & Services | 2.64 | 12.86 |
| Information Technology | Technology Hardware & Equipment | 2.15 | 18.22 |
| Interest Rate / Gov Related / Gov | Interest Rate / Gov Related / Gov | 1.56 | 1.56 |
| Materials | Materials | -0.58 | 26.62 |
| Real Estate | Equity Real Estate Investment Trusts (REITs) | -0.78 | 3.16 |
| Real Estate | Real Estate Management & Development | -0.29 | 6.66 |
| Utilities | Utilities | -3.15 | 6.63 |

The list above is based on the average of the Fund's gross and net exposure as a % of NAV at each quarter end during the reference period.

Exposures have been provided on a look through basis for index futures, index options, TRS positions and CFD baskets where possible and netted at the issuer level. There may be instances where a proxy has been used.

The % of NAV aligned to economic sectors referred to above are derived from the Schroders Investment Book of Record (IBoR) data source. The % of NAV aligned to economic sectors detailed elsewhere in the Audited Annual Report are derived from the Accounting Book of Record (ABoR) maintained by the administrator. As a result of these differing data sources, there may be differences in the % of NAV aligned to economic sectors due to the differing calculation methodologies of these alternative data sources.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There was no extent to which the Fund's investments (including transitional and enabling activities) with an environmental objective were aligned with the Taxonomy. Taxonomy alignment of this Fund's investments has therefore not been calculated and has as a result been deemed to constitute 0% of the Fund's portfolio.

| • Did the financial product invest in fossil gas and/or nucl with the EU Taxonomy¹? | ear ener | gy related activities complying |
|--|----------|---------------------------------|
| Yes: | | In nuclear energy |
| X No | | in nacion energy |

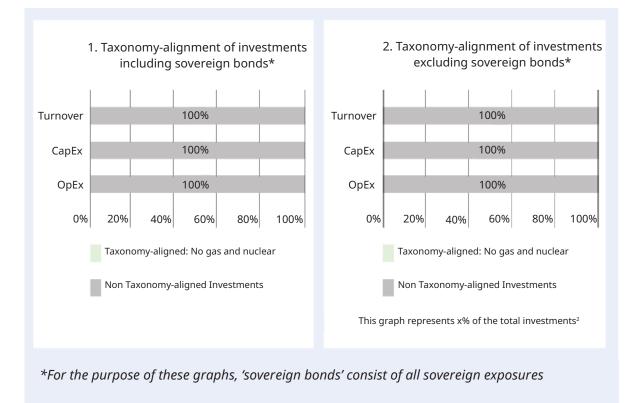

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

²As there is no Taxonomy-alignment, there is no impact on the graph if sovereign bonds are excluded (i.e. the percentage of Taxonomy-aligned investments remains 0%) and the Management Company therefore believes that

• What was the share of investments made in transitional and enabling activities?

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

• How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This question is not applicable.

there is no need to mention this information.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reference period and based on quarter-end data, the Fund invested 14% of its gross exposure in sustainable investments with an environmental objective that were not aligned with the Taxonomy. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 28% of its long exposure in sustainable investments with an environmental objective that were not aligned with the Taxonomy.

What was the share of socially sustainable investments?

During the reference period and based on quarter-end data, the Fund invested 17% of its gross exposure in sustainable investments with a social objective. This percentage is provided for consistency with the basis of the calculations in the asset allocation section above. The Fund invested 34% of its long exposure in sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other includes investments that are not scored by Schroders' proprietary sustainability tools and so do not contribute towards the Fund's sustainability score. Cash and cash equivalents are excluded from #2 Other due to the long / short nature of the Fund's investment strategy.

Minimum safeguards were applied where relevant to Money Market Instruments and options used with the aim of reducing risk (hedging) or other investments by restricting (as appropriate) investments in counterparties where there were ownership links or exposure to higher risk countries (for the purpose of money laundering, terrorist financing, bribery, corruption, tax evasion and sanctions risks). A firmwide risk assessment considers the risk rating of each jurisdiction; which includes reference to a number of public statements, indices and world governance indicators issued by the UN, the European Union, the UK Government, the Financial Action Task Force and several Non-Government Organisations (NGOs), such as Transparency International and the Basel Committee.

In addition, new counterparties were reviewed by Schroders' credit risk team and approval of a new counterparty was based on a holistic review of the various sources of information available, including, but not limited to, quality of management, ownership structure, location, regulatory and social environment to which each counterparty is subject, and the degree of development of the local banking system and its regulatory framework. Ongoing monitoring was performed through a Schroders' proprietary tool, which supports the analysis of a counterparty's management of environmental, social and governance trends and challenges.

Schroders' credit risk team monitored the counterparties and during the reference period to the extent counterparties were removed from the approved list for all funds in line with our policy and compliance requirements, such counterparties were ineligible for use by the Fund in respect of any relevant investments from the date they were removed.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken during the reference period to meet the environmental and social characteristics promoted by the Fund were the following:

- The Investment Manager applied sustainability criteria when selecting investments for the Fund;
- The Investment Manager considered the sustainability score of the Fund when selecting the assets held by the Fund;
- A good governance assessment was applied throughout the period; and
- The Investment Manager (including indirectly via managers of underlying strategies) undertook engagements covering one or more of the six priority themes set out in our engagement blueprint (link https://mybrand.schroders.com/m/3222ea4ed44a1f2c/original/schroders-engagement-blueprint.pdf). A summary of the Fund's engagement activity, including the number of issuers engaged with and the related theme, is shown above in the question 'How did this financial product consider principal adverse impacts on sustainability factors?'. Through our engagement activities, we build relationships and have a two-way dialogue with our investee companies. We aim to drive change that protects and enhances the value of our investments.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. No index was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

How does the reference benchmark differ from a broad market index?

This question is not applicable for this Fund.

 How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This question is not applicable for this Fund.

How did this financial product perform compared with the reference benchmark?

This question is not applicable for this Fund.

How did this financial product perform compared with the broad market index?

This question is not applicable for this Fund.
