## Risk Considerations

- A security issuer may not be able to meet its obligations to make timely payments of interest and principal. This will affect the credit rating of those securities.
- Currency derivative instruments are subject to the default risk of the counterparty. The unrealised gain and some of the desired market exposure may be lost.
- Investment in bonds and other debt instruments including related derivatives is subject to interest rate risk. The value of the fund may go down if interest rate rise and vice versa.

## Important Information

Investors' attention is drawn to the fact that:

- a Money Market Fund is not a guaranteed investment;
- an investment in a Money Market Fund is different from an investment in deposits as the principal invested in a Money Market Fund is capable of fluctuation;
- the Money Market Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the Net Asset Value per share; and
- the risk of loss of the principal is borne by investors.
