

Schroder ISF* Japanese Equity

Fund Manager: Kazuhiro Toyoda | Fund update: July 2025

Performance overview

- The Japanese equity market gained momentum toward month-end, with the TOPIX Total Return rising 3.2% and the Nikkei 225 up 1.4%, led by better-than-expected Upper House election result and U.S.-Japan trade deal. Due to yen weakness, the sterling-based return for the TOPIX was decreased to +2.5%.
- The fund underperformed against the benchmark for the month of July.

Drivers of fund performance

- While sector allocation effect was neutral to the relative fund performance, stock selection detracted from the performance.
- Sector allocation effect was marginal across sectors, but our underweight in Wholesale Trade, Electric Power & Gas, and Oil & Coal Products had negative impacts on the relative performance, while our overweight in Banks and Construction helped the performance, as well as our underweight in Retail Trade.
- The largest individual positive contributor came from not holding Nintendo, as taking-profit activities weighed upon the company's share price. SWCC, a small cap player in electrical and communications infrastructure sector, also added value as the share price gained momentum on improving earnings prospects. Additionally, Nishi-Nippon Financial Holdings, a small cap regional bank, also contributed positively with higher long term yield and improving economic outlook reflecting progress on the U.S trade negotiation.
- Conversely, the largest detractor was Capcom, a mid cap gaming provider, as the company announced a disappointing sales trend on newly released gaming title. Amidst improving investor sentiment towards AI-related names, not holding Hitachi also detracted the relative performance. Additionally, Shin-Etsu Chemical, a large cap chemical player, also affected the performance negatively upon weaker than expected guidance.

Outlook/positioning

- The Japanese equity market extended its rally through July, with the TOPIX reaching a new record high. Early-month concerns over the Upper House election and U.S.-Japan trade talks weighed on sentiment, but investor confidence recovered following a favourable election outcome and a better-than-expected trade agreement. Exporters and global cyclical led the rebound. AI-related demand, especially for data centres, also boosted sectors like optical components. However, political uncertainty persists as the ruling coalition lost its majority in both the Upper and Lower Houses.
- While recent trade deals eased some tariff concerns, overall levels remain elevated, and their full impact on growth and earnings is still unfolding. Initial quarterly earnings reports were broadly in line, with domestic sectors showing resilience and exporters facing pressure.
- Despite short-term volatility, structural tailwinds—particularly governance reforms—remain intact. In this environment, companies with strong fundamentals and ROE-focused strategies are likely to attract investor interest, offering opportunities for active managers to generate alpha.

Calendar year performance (%)

Year	Fund	Target
2024	+13.6	+20.0
2023	+20.1	+27.8
2022	-4.2	-2.9
2021	+11.1	+12.4
2020	+6.4	+7.0
2019	+16.5	+17.7
2018	-16.0	-16.3
2017	+25.4	+21.8

Source: Schroders, net of fees, NAV to NAV with net income reinvested. C Acc share class. Past performance is not a guide to future performance and may not be repeated. The value of investments and the income from

them may go down as well as up and investors may not get back the amount originally invested. Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the

benchmark. Please see the respective fund factsheets for the performance of other share classes.

Risk considerations

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Counterparty risk: The fund may have contractual agreements with counterparties. If a counterparty is unable to fulfil their obligations, the sum that they owe to the fund may be lost in part or in whole.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates.

Currency risk / hedged shareclass: The hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

Derivatives risk – efficient portfolio management and investment purposes: Derivatives may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. When the value of an asset changes, the value of a derivative based on that asset may change to a much greater extent. This may result in greater losses than investing in the underlying asset.

Higher volatility risk: The price of this fund may be volatile as it may take higher risks in search of higher rewards.

IBOR risk: The transition of the financial markets away from the use of interbank offered rates (IBORs) to alternative reference rates may impact the valuation of certain holdings and disrupt liquidity in certain instruments. This may impact the investment performance of the fund.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Market risk: The value of investments can go up and down and an investor may not get back the amount initially invested.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Important information

This information is not an offer, solicitation or recommendation to buy or sell any financial instrument or to adopt. This document does not constitute an offer to anyone, or a solicitation by anyone, to subscribe for shares of Schroder International Selection Fund (the "Company"). Nothing in this document should be construed as advice and is therefore not a recommendation to buy or sell shares. Subscriptions for shares of the Company can only be made on the basis of its latest Key Investor Information Document and prospectus, together with the latest audited annual report (and subsequent unaudited semi-annual report, if published), copies of which can be obtained, free of charge, from Schroder Investment Management (Europe) S.A. The Company is a Luxembourg-registered UCITS recognised in the UK under Section 264 of the Financial Services and Markets Act 2000. There will be no right to cancel any agreement to purchase shares. If shares are purchased directly or through an overseas agent not authorised to carry out regulated activities in the UK, all or most of the protection provided by the UK regulatory system will not apply to investments in the Company and compensation will not be available under the UK Financial Services Compensation Scheme and the Financial Ombudsman Service. An investment in the Company entails risks, which are fully described in the prospectus.
